GEOGRAPHY / MAP SKILLS

Learn the terms, then read two published maps

Name _____ Date _____

Your mission

Use the maps as evidence for every answer.

Legend or key	Explains the meaning of symbols and colors.
Compass rose	Shows north, south, east, and west.
Scale	Shows how map distance relates to real distance.
Latitude	East-west lines that measure north or south of the equator.
Longitude	North-south lines that measure east or west of the prime meridian.
Equator	0° latitude; divides Northern and Southern Hemispheres.
Prime meridian	0° longitude; divides Eastern and Western Hemispheres.

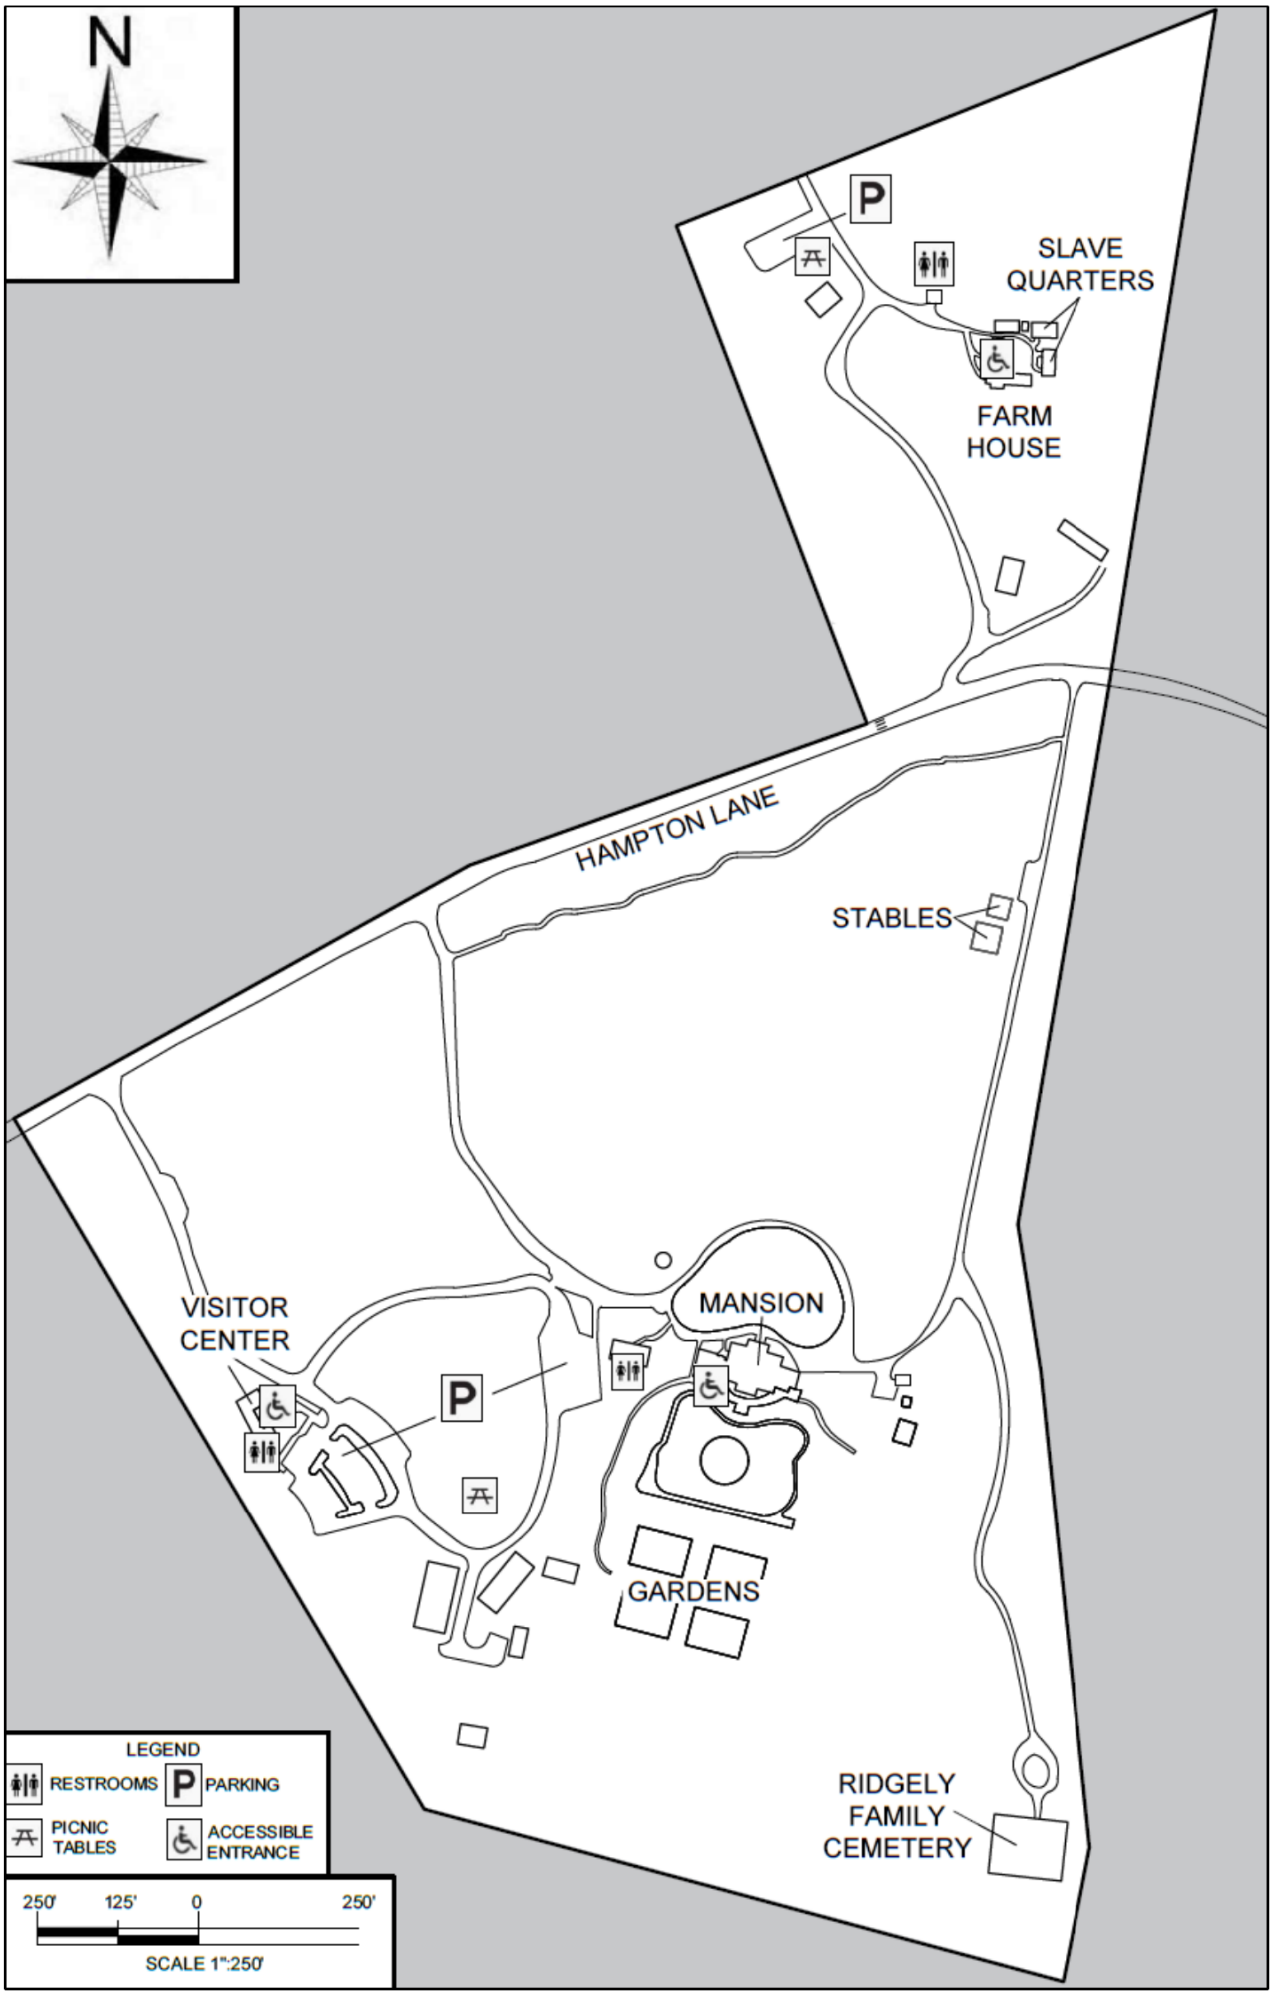

Remember

Latitude lines run across; longitude lines run from pole to pole.

Write coordinates in this order: latitude, then longitude.

Use the scale bar for distance estimates on a resized map.

MAP 1 / HAMPTON NATIONAL HISTORIC SITE

Official National Park Service classroom map. Use the scale bar for distance.

Use the published park map on page 2.

1. What does the boxed P symbol mean?

A. Parking B. Picnic area C. Path

2. Which direction is the Farm House from the Mansion?

A. Southwest B. Northeast C. West

3. Which place is south of the Mansion?

A. Gardens B. Farm House C. Stables

4. What road passes between the Farm House and Mansion?

A. Park Road B. Hampton Lane C. Garden Lane

5. What unit is used in the map scale?

A. Miles B. Kilometers C. Feet

6. Which direction is at the top of the compass rose?

A. North B. East C. South

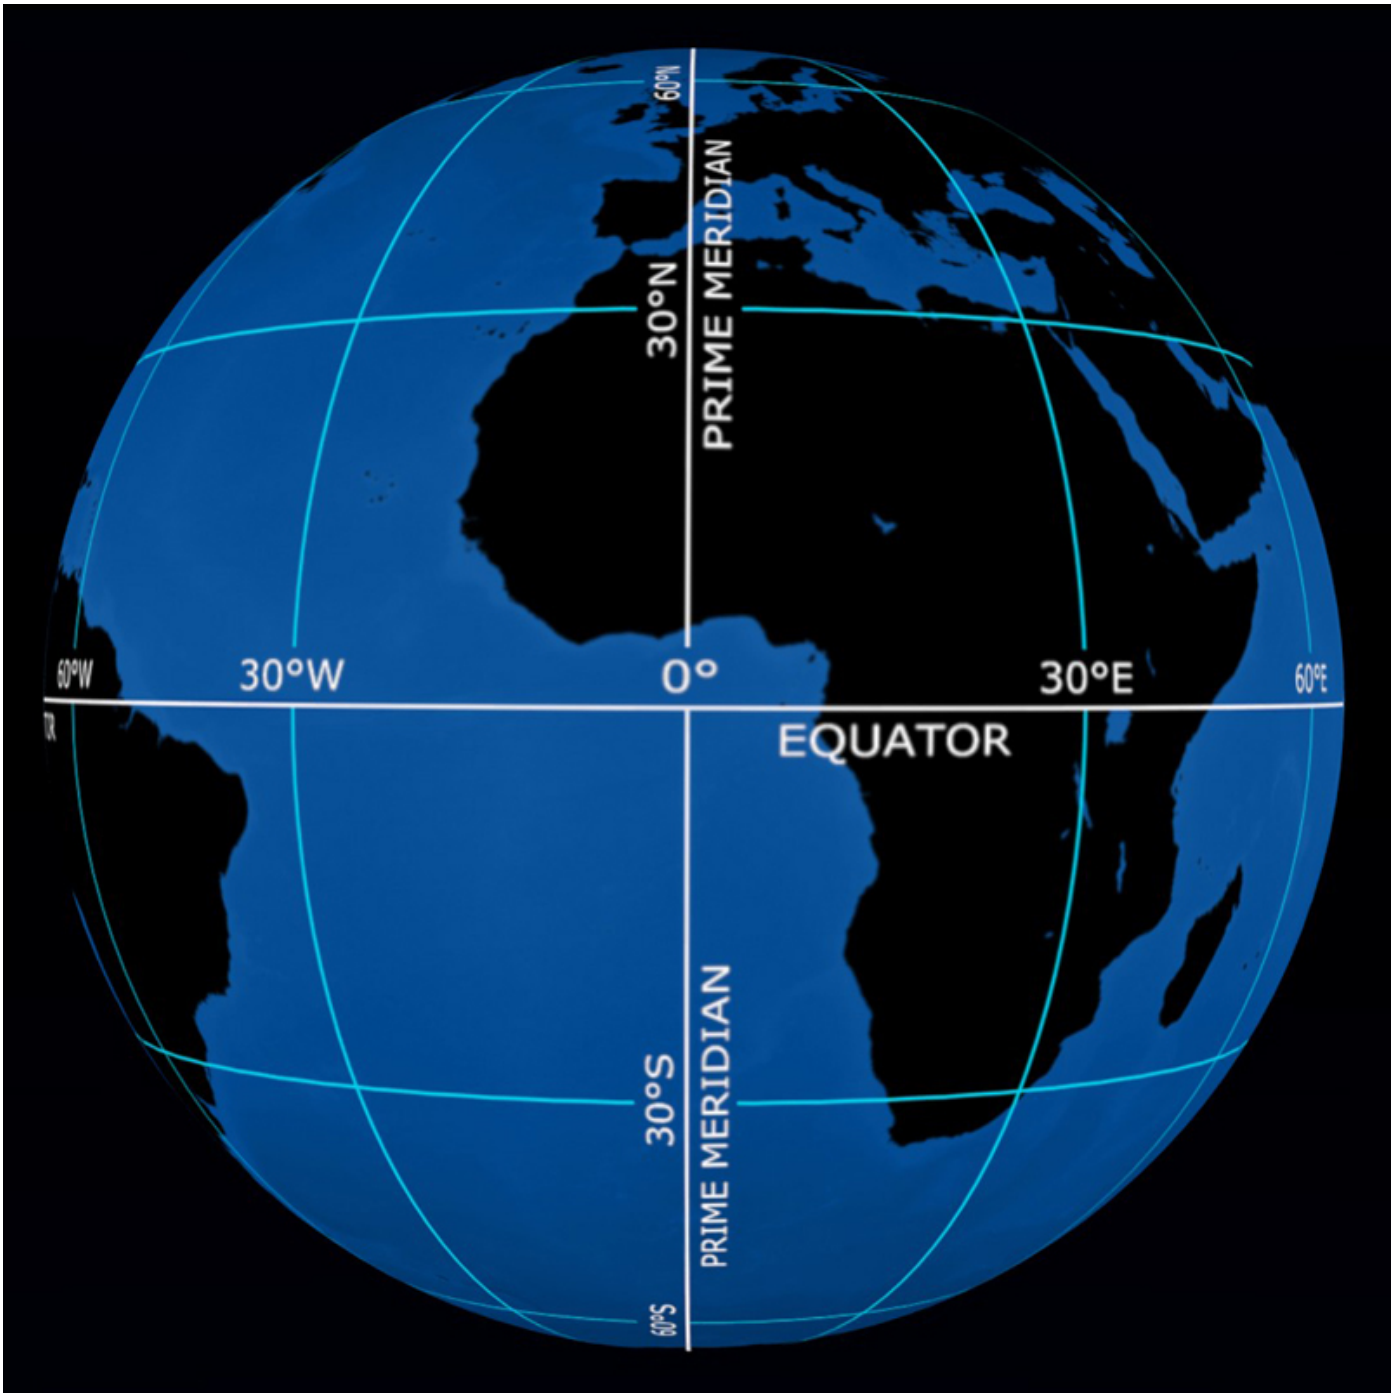

7. Name two visitor services shown in the legend.

8. Name two labeled places north of Hampton Lane.

9. Estimate the straight-line distance from the Visitor Center to the Mansion.
Use the scale bar. About how many feet is it?

10. Why might the walking distance be longer than your estimate?

The lines and Earth image below come from a NOAA learning map.

Read the labels on the globe.

White lines: equator and prime meridian. Blue lines: other degrees.

Source: NOAA Science On a Sphere, Latitude Longitude Layers.

Use the published NOAA map on page 4.

11. Which line is 0° latitude?

A. Equator B. Prime meridian C. 30°W

12. Which line is 0° longitude?

A. 30°S B. Equator C. Prime meridian

13. Which label is west of the prime meridian?

A. 30°E B. 30°W C. 30°N

14. Which line is south of the equator?

A. 30°S B. 30°N C. 0°

15. Where do 0° latitude and 0° longitude meet?

A. In Africa B. In the Atlantic Ocean C. In Europe

16. Which line runs from north to south?

A. Equator B. Prime meridian C. 30°S

17. Why is Africa in both Northern and Southern Hemispheres?

18. What are the coordinates where 30°E meets the equator?

19. Name the hemispheres at 30°S, 30°W.

20. Explain how latitude differs from longitude.

Accept similar wording and reasonable distance estimates.

Hampton National Historic Site

1. A. Parking.
2. B. Northeast.
3. A. Gardens.
4. B. Hampton Lane.
5. C. Feet.
6. A. North.
7. Any two: restrooms, parking, picnic tables, accessible entrance.
8. Farm House and slave quarters.
9. About 700-800 feet, using roughly three 250-foot scale bars.
10. The walking paths curve rather than following a straight line.

NOAA latitude-longitude map

11. A. Equator.
12. C. Prime meridian.
13. B. 30°W.
14. A. 30°S.
15. B. In the Atlantic Ocean.
16. B. Prime meridian.
17. The equator crosses Africa.
18. 0° latitude, 30°E longitude.
19. Southern and Western Hemispheres.
20. Latitude measures north or south; longitude measures east or west.
